The goal of the **Center for Forecasting and Outbreak Analytics (CFA)** is to enable timely, effective decision-making to improve outbreak response using data, modeling, and analytics.

To do so, CFA will produce models and forecasts to characterize the state of an outbreak and its course, inform public health decision makers on potential consequences of deploying control measures, and support innovation to continuously improve the science of outbreak analytics and modeling.

Learn more about our leaders and [who we are](/forecast-outbreak-analysis/about/who-we-are.html).

Early CFA Successes

CFA partnered with the pediatric acute hepatitis incident response team to produce a detailed technical report of the ongoing investigation.

[Learn more about CFA successes](/forecast-outbreak-analysis/about/what-we-do.html).

Ending

When epidemics like seasonal influenza, new HIV infections, and opioid overdoses occur, we work to quickly detect and address them to reduce their potential impact in America.

COVID-19 Response

On January 21, 2020 CDC launched its agency wide response to the COVID-19 pandemic. It has been the largest response to any disease outbreak in CDC's history.

Preparing & Responding

Our job is to prevent, detect, and respond to diseases wherever they are so that diseases don't come into the United States.

Eliminating Disease

CDC provides domestic and international leadership, as well as laboratory and epidemiology expertise, to respond and work toward eliminating every disease we can.

#### Thailand Photo Essay: Innovative CDC Trainings for COVID-19 Responders

When the pandemic started, CDC Thailand collaborated to enhance workforce capacity of the Ministry of Public Health COVID-19 laboratory. Training was done with a Virtual Reality system.

Global Health Issues

## Explore Global Health Issues

A disease threat anywhere is a disease threat everywhere.

CDC is working 24/7 to prevent, detect, and respond to many types of health threats.</p>
